	Substrate Temp.	Touch Dry	Overcoating Interval	
			Maximum	Hard Dry
Drying time	25°C	4-5 hours	12 hours	48 hours

Application Data

Method of application : Brush, roller, sea sponge, roller with special effects, cloth, rag, etc.

Thinner : N.A

Thinning ratio (by vol.) :

Surface Preparation

The performance of this coating is directly related to the degree of surface preparation.

- Ensure surface is clean, dry and free from all contaminants.
- Surface must be sound and free from laitance.
- Remove laitance by wire brush or sweep blast.

Note: Fungal growth should be treated with Bison Fungicidal Solution. After drying, one coat of Plastaseal Penetrating Sealer should be applied.

Application Details

- Ensure adequate ventilation during application and drying.
- Do not apply when humidity exceeds 85% and condensation is likely.
- Surface temperature should be 3°C or more above dew point.
- Stir the contents thoroughly before and during use, with a broad flat stirrer, using an upward lifting action.

Use appropriate application tool depending on the design required to be created. It is suggested that a high quality application tool be used to ensure superior effects.

TYPICAL PAINT SYSTEM

1 coat x Supreme AR Primer

As required: Supreme Stucco

2 coats x Supreme Silk Emulsion

RoyaleplayKIDSGLOW
